

Notes:

0/ based on larger size from Godzilla's BIB site

1/ 18 mm material

2/ these use a specific foot which requires the lower "side pods" to accommodate them. Feel free to do something else

3/ Height off the floor is calculated to such that the exit area = 5m

4/ Carlson slot can be divided in 2 and placed on the sides to allow pushing close up against a wall

5/ Karlson slot info, including a calculator, can be found at
 <<http://members.aol.com/klehma/karlson.html>
 ?mtbrand=AOL_US> and
 <<http://home.planet.nl/%7Eulfman/>>
