

Notes
 0/ drawn with 18mm material. Quality plywood recommended. With adequate driver-to-driver bracing one could get away with as little as 12mm.
 1/ for 2 x Mark Audi but recommended. Braces should run in the direction of the line
 5/ beveling front vertical edges recommended
 6/ stabilizing plinth recommended
 7/ designed to be used as a quadropole with the inverted upper box in front - rear firing mode so the drivers are near ear height. Lower box can have drivers firing to the side or front-back.

Short Bipole ML-TL ov82
